Connor-Winfield's new EGOV5S3 OCXO Oscillator Offers "Oven Ready" Indicator Pin

Connor-Winfield's new EGOV5S3 is a 14 Pin DIP Package, 62 MHz, OCXO Oscillator with a "Oven Ready" indicator pin. Once the device has reached its operating temperature, a dedicated logic pin is activated to notify the system. With its low jitter and tight frequency tolerance, this oscillator is suitable for use in PLL circuits used in Stratum 3 system applications. This oscillator is one in a family of "Oven Ready" OCXO oscillators.

Product Exclusive: A dedicated logic pin activates, telling the system that the device has reached its operating temperature.

Features of the family of OCXO crystal controlled oscillators include:

- "Oven Ready" indicator pin
- 1 - 80 MHz Frequency Range options
- $\pm .25$ ppm stability
- ± 4.6 ppm frequency tolerance
- < 3 ps RMS jitter – 10 Hz to 20 MHz
- Enable / Disable Control
- High pullability - ± 45 ppm minimum
- 14 Pin DIP Package

Pricing at \$69.00 each in 500 quantities. Four to six week lead time.
