## **New Connor-Winfield Synchronous Timing Module Specifically Conforms to ITU-T-G813 Standard for European Operation**

Connor-Winfield introduces an ITU Compatible, Simplified Control Module for use in timing cards in European Telecommunications networking equipment. Designers now have a local supplier for their global applications. The new MSTM-SEC1 is similar to the familiar MSTM-S3, acting as part of a complete system clock for general Stratum 3 applications.

**Product exclusive:** The MSTM-SEC1 is the first Stratum 3 Simplified Control Module designed specifically for the European Telecommunications market.

Features of the new MSTM-SEC1 (option 1) include:

- Meets ITU-T-G813 Standard for European operation
- Frequencies: 1.544 to 51.84 MHz
- 5V or 3.3V
- CMOS Output
- Holdover precision: < 2 ppm
- Bandwidth: 1 Hz
- 0 – 70°C

Prototype quantities are available now, \$175.00 @ 1K pieces.
